RECRUITING!**

VASCULAR ANOMALIES FAMILY PLANNING STUDY

A researcher at Ohio University is recruiting female patients with vascular anomalies to participate in an interview about their experiences related to pregnancy, fertility, and family planning. **We want to hear from you!**

You are eligible to participate if your vascular anomaly has played a significant role in:

- Your decision to prevent pregnancy
- Your decision to try to get pregnant
- Your health care while trying to conceive
- Your health care while pregnant
- Your uncertainty about the decision to get pregnant or have children

Essentially, we want to learn more about the experience of preventing pregnancy, trying to get pregnant, or being pregnant with a vascular anomaly and how you reached that decision.

Interviews will last approximately 45-60 minutes and take place via phone or Zoom.

**All participants who
complete an interview
will receive \$40**
