

Do you or your child have a vascular malformation (VM)?

You may be eligible to participate in an interview about VMs.

We are doing a research study to talk to people with vascular malformations, specifically:
Lymphatic Malformations (LM)
and
PIK3CA-Related Overgrowth Spectrum (PROS)
(including but not limited to: Klippel-Trenaunay Syndrome, CLOVES Syndrome, FAVA, M-CAP)

We are looking for individuals in the US ages 12 years and older with LM or PROS to participate in one 90-minute phone or videoconference interview, which will be audio-recorded.

During interviews we would like to discuss the signs, symptoms and impacts of living with LMs or PROS. We will also ask for feedback on questionnaires about VM.

You (or your child) will receive \$250 for completing the interview. Confirmation of clinical diagnosis will be required for participation.

This is NOT a medication-related study. No medication will be administered. Inclusion in the interviews will not replace or affect any care or assistance you (or your child) receive or may receive in the future.

For more information, or if you or your child wish to participate, please reach out to:

- By email: ashley.maggio@pinpointpatientrecruiting.com
- By phone: 704-226-4187

Thank you for considering taking part in this study!
